Gentlemen:

The Yorklyn Plant Complex of the NVE Co. must remove certain zinc-contaminated earth from the plant site as a part of a Consent Order of 12/14/77 with the Delaware Department of Natural Resources and Environmental Control. Our consultants, Edward H. Richardson Assoc., Inc. have recommended that the excavated earth be landfilled in the New Castle County Pigeon Point landfill as that facility has a leachate collection system.

We are hereby requesting permission to dispose of this evacuated earth in the Pigeon Point landfill. One area is estimated to contain 30-50 cubic yards; the second area is estimated to contain 500 cubic yards. Description of these two areas are found in the E. H. Richardson Assoc., Inc. report dated November, 1977, a copy of which is in the possession of the Water Resources Section of the Delaware DNREC.

We would appreciate a prompt reply to our request. Please also advise what fee would have to be paid for this excavated earth. If there are any questions or if further information is desired, please contact us directly at 239-5281.

Very truly yours,

NVE COMPANY
